

# Sage

## GROWING REQUIREMENTS

---

**Soil:** Any well-drained soils, try to avoid acidic soils

---

**Water:** Moderate to low  
Wet soils can be fatal

---

**Sun:** Full sun

---

**Other Notes:** Perennial. 1-2 feet high

---

## PLANT DESCRIPTION

---

Leaves are used fresh or dried in poultry and pork dishes. The flavor of the leaves will be best in warm, dry conditions. The broad wrinkled grey-green leaves and beautiful purple flower spikes make this plant a fantastic ornamental. To keep plants bushy, prune in spring to encourage new shoots with strong flavor

---
